

The European Productivity Network

The European Association of National Productivity Centres (EANPC) was established in 1966, as a successor body to the European Productivity Agency. Its purpose is to facilitate and increase the exchange of information and experiences on competitiveness, innovation and productivity.

...making Europe more productive

Competitiveness

Competition is the driving force behind the development of productivity and growth. The human factor can be a valuable element in enterprise competitiveness when it consists of 2 equally important aspects: high quality human resources and a good organisation of people's work.

Innovation

Innovation is the dynamic element of production and growth. Technology is one of the main contributing factors to productivity development, but the human factor as well as the organisational structure and culture are needed in order to make an organisation competitive.

Productivity

Productivity in its holistic concept includes all natural, infrastructural and organizational resources which enterprises use to achieve their results. Outputs not only include products and services, but also the social and ecological impacts of the production process.

The Memorandum "Productivity – the high road to wealth" sets out the goals of EANPC and its prime areas of concern. It presents, under the scope of productivity development, various economic policy and labour policy facts, and integrates key areas of concern into a productivity flower.

Why join EANPC?

- Do you want to be at the heart of productivity in Europe?
- Do you want to look at productivity differently? Going beyond the traditional, but out-dated understanding of the output - input relation.

Join the European Productivity Network!

Full members

- Create, collect, exchange and disseminate information on productivity
- Contribute to the policy / strategy of the network
- Represent your country in a network that supports sustainable productivity development in Europe!

Associated members

- Collaborate in funded projects (for example, HESAPRO)

Individual members

- Are you a researcher, academic, practitioner, trainer, consultant... ?
- Are you an expert on one or more petals of the productivity flower?
- Become part of the EANPC “think tank”, and
- Provide conceptual or practice-based input to the network!

Advantages

More advantages of becoming a member of the European Productivity Network?

- Attend all of our seminars, events etc. at a discount rate!
- Get in contact with other organisations interested in productivity!
- Share your knowledge and experiences with others!

All members should agree with and share the principles and ideas of the network as described in the [EANPC Memorandum](#).

If you are a European organisation responsible for, or interested in, the promotion of productivity development – and you could benefit from the information and experience gathered by EANPC, please e-mail secretariat@eanpc.eu or go to our website and subscribe to the newsletter.
