

## ADDITIONAL ONLINE-TOOLS:

### Playing with numbers

Mag. Claudia Scarimbolo, Head of the WIFI SME Support Centre, raised great interest presenting the digital tools “SME Stress Test” and “Controlling Numbers”. These tools allow entrepreneurs to deal with complex data material in a playful manner.

The free online reference guide “SME Stress Test” informs entrepreneurs by allowing them to see their company’s crisis readiness in just a couple of minutes.

Subsequently to entering the data a simulation programme is set in motion that calculates the company’s endurance and liquidity. The other free online calculation aid “Controlling Numbers” was designed specifically for micro-companies and one-person businesses: the tool calculates revenue and expenses and makes it possible for entrepreneurs to regularly control their numbers.
